[Applies to Kaspersky Rescue Disk 10](#)

Huge number of new viruses and their modifications appear every day. Therefore, before scanning your computer it is strongly recommended to update anti-virus databases of Kaspersky Rescue Disk 10.

You can update anti-virus databases of Kaspersky Rescue Disk by the following methods:

1. While creating a rescue disk using Kaspersky Anti-Virus 2012/2011 or Kaspersky Internet Security 2012/2011

If you do not have a bootable rescue disk (on a CD or USB-device), you can create it using Kaspersky Anti-Virus 2012/2011 or Kaspersky Internet Security 2012/2011. During rescue disk creation process you will be asked to download latest anti-virus databases.
